

A-WARD™

MiTilt™

CUSTOMIZED CONTAINER LOADING AND UNLOADING SOLUTIONS

MiTilt™ INDUSTRY BROCHURE

INTRODUCING *MiTilt™*

[CONTAINER LOADERS]

Loading shipping containers at 90 degrees enables companies to fill 100% of a container's volume, therefore optimizing freight efficiency. Shipping containers can be inserted either directly with a standard trailer or from above with a forklift, crane or reach stacker.

OTHER BENEFITS:

- Speed up the container loading process.
- Reduce labor.
- Weigh the container during loading.
- Maximize operator safety.

COFFEE

Kraft Foods in France uses an A-Ward container loader to load coffee beans into shipping containers for domestic storage.

SCRAP METAL

Over 350 scrap metal recyclers globally use A-Ward container loaders to maximize their container loads of export scrap metal.

COAL

Ibercoal in Portugal uses an A-Ward container loader to load coal into shipping containers for export.

MINERALS

Australia's largest mining companies use A-Ward container loaders to export Mixed Hydroxide Precipitate (nickel extract).

[CONTAINER UNLOADERS]

A-Ward container unloaders enable immediate and controlled unloading of shipping containers and remove the reliance on expensive and scarce tilting trailers. Shipping containers can be inserted either directly with a standard trailer or from above with a forklift, crane or reach stacker.

OTHER BENEFITS:

- Maximize operator safety.
- Reduce labor.
- Control unloading speed by adjusting tilt angle.
- Ability to unload over a longer period of time.

PLASTIC GRANULES

Coca-Cola, Tetra-Pak, Indorama, Abu Dhabi Polymers and Bumi Mulia all use A-Ward container unloaders to unload polymers.

GRAIN

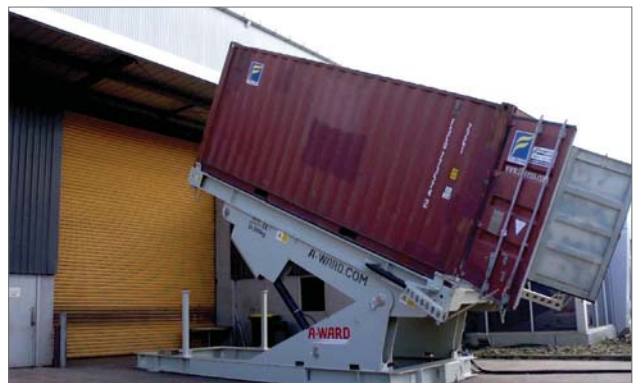

Some of the world's largest grain companies use A-Ward container loaders and unloaders to handle grains and other agricultural products.

SUGAR

Malayan Sugar Manufacturing Co uses an A-Ward container loader to load containers for Heinz Wattie's. Heinz Wattie's uses an A-Ward container unloader to unload sugar for jam manufacturing.

BALL BEARINGS

The world's largest clay ore mines use A-Ward container unloaders to unload ball bearings to grind down coarse clay material.

UNLIMITED OPTIONS TO CUSTOMIZE YOUR PERFECT SOLUTION

POPULAR ACCESSORIES

DIGITAL SCALE SYSTEM

Enables the maximum loading weight to be achieved every time.

RADIO REMOTE CONTROL

Reduces labor costs by enabling the tilter to be operated by a single operator.

HYDRAULIC CONTAINER DOOR ARMS

Allows the container doors to be opened and closed at any stage.

ACCESS LADDER

Enables operators to safely access the top of the container.

REAR CONTAINER SUPPORT BRACE

Different versions available where high-impact materials are being loaded.

POWER PACK

15kw and 30kw versions available in both diesel and electric models.
